**Mundoval Fund
Annual Report
December 31, 2017**

Dear Shareholders,

For the year ended December 31, 2017, the Mundoval Fund (the "Fund") returned 18.86% versus 22.40% for the MSCI World Index. Since inception on September 3, 2004, the annualized rate of return through December 31, 2017 for the Mundoval Fund was 6.84% versus 7.55% for the MSCI World Index.

Assets under management in the Fund as of December 31, 2017 were \$23.91 million. During the year, shares of International Business Machines, Teva Pharmaceuticals, Mobile Telesystems, Lukoil Oil, Tesco Plc, Petrobras, CNOOC, Gazprom, Lear Corp, Enel Americas, Chicago Bridge & Iron, MTN Group, LG Display and Comphania Paranes de Energia were sold because the investment adviser believed them to be fairly valued or determined that there were more attractive businesses to be purchased with the proceeds. New security positions for the year included T. Rowe Price Associates, Anheuser Busch Companies, The Walt Disney Co., Nike Inc., Gilead Sciences, Hershey Foods Corp., TJX Companies, Michelin, 21st Century Fox and Stericycle Inc. The geographic diversification of the Fund as of December 31, 2017 is 55.25% domestic stocks, 37.36% international stocks with 7.39% net cash equivalents. As of December 31, 2017, the Fund owned shares of common stock in 35 companies.

In 2017, stocks around the world surged upward due to improving economic growth and strong corporate profitability. More than \$9 trillion in market value was added to the global stock markets in 2017. Three of the better performing industry sectors in 2017 were Information Technology, Consumer Discretionary and the Financial Sectors.

The Mundoval Fund was a beneficiary of the performance of all three sectors during the year. Our Information Technology holdings in Apple, Alphabet (a.k.a. Google) and Mastercard all contributed rates of return that exceeded 30% in 2017. Financial sector companies, Citigroup, T. Rowe Price Associates and Bank of America all returned more than 25% during the year. Health Care companies, Teva Pharmaceuticals and Allergan Plc, as well as, Consumer Discretionary company, Discovery Communications, were laggards that negatively impacted investment performance in the Fund during the year.

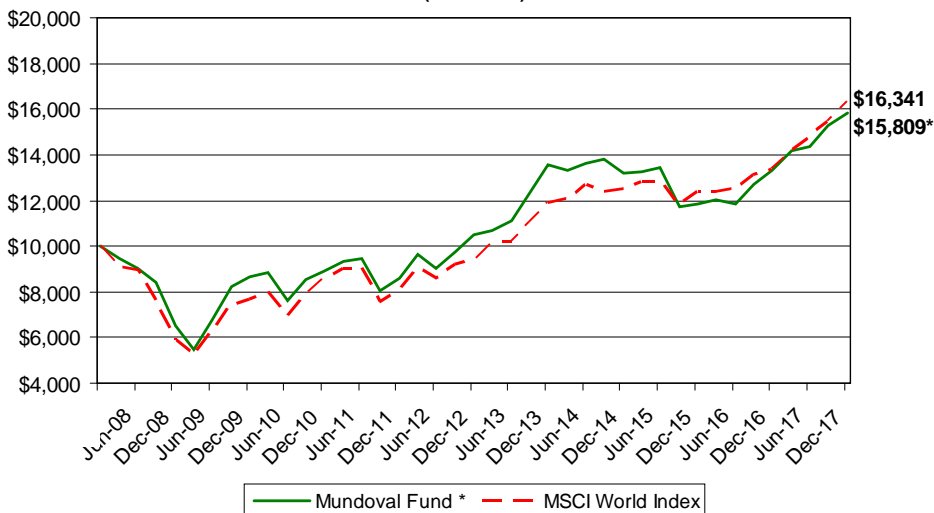

2017 marked the first year since 2012 that International stocks in developed markets, as measured by the MSCI EAFE Index, outperformed the S&P 500 Index due to stellar rates of return in Europe and Japan. Emerging Markets, as measured by the MSCI Emerging Markets Index, performed even better in 2017 due to strong rates of return in India and Brazil. According to the Investment Company Institute, investors allocated \$221 billion into international equity funds in 2017, which is the largest one year allocation since the year 2000.

Thank you for your business and continued support.

Expense Example (Unaudited)

Shareholders of this Fund incur ongoing expenses consisting solely of management fees. Although the Fund charges no sales loads or transaction fees, you will be assessed fees for outgoing wire transfers, returned checks and stop payment orders at prevailing rates charged by Mutual Shareholder Services, LLC, the Fund's transfer agent. IRA accounts will be charged an \$8.00 annual maintenance fee. The following example is intended to help you understand your ongoing costs of investing in the Fund and to compare these costs with similar costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested in the Fund on July 1, 2017 and held through December 31, 2017.

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. In order to estimate the expenses a shareholder paid during the period covered by this report, shareholders can divide their account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6) and then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses paid by a shareholder for the period. Shareholders may use this information to compare the ongoing costs of investing in this Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in other funds' shareholder reports.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as the charges assessed by Mutual Shareholder Services, LLC as described above. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

| | Beginning Account Value <u>July 1, 2017</u> | Ending Account Value <u>December 31, 2017</u> | Expenses Paid During the Period* July 1, 2017 to <u>December 31, 2017</u> |

| Hypothetical (5% annual return before expenses) | \$1,000.00 | \$1,017.64 | \$7.63 |

- * Expenses are equal to the Fund's annualized expense ratio of 1.50%, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period ended December 31, 2017).

NOTES TO FINANCIAL STATEMENTS

MUNDOVAL FUND

December 31, 2017

1.) ORGANIZATION

The Mundoval Fund (the "Fund") is a diversified series of the Mundoval Funds (the "Trust"), an open-end management investment company. The Trust was organized in Ohio as a business trust on March 24, 2004 and may offer shares of beneficial interest in a number of separate series, each series representing a distinct fund with its own investment objectives and policies. The Fund commenced operations on September 3, 2004. The Fund's investment objective is long-term capital appreciation.

2.) SIGNIFICANT ACCOUNTING POLICIES

The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 Financial Services - Investment Companies. The financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The Fund follows the significant accounting policies described in this section.

SECURITY VALUATION: All investments in securities are recorded at their estimated fair value, as described in Note 3.

SHARE VALUATION: The net asset value (the "NAV") is generally calculated as of the close of trading on the New York Stock Exchange (the "Exchange") (normally 4:00 p.m. Eastern time) every day the Exchange is open. The NAV is calculated by taking the total value of the Fund's assets, subtracting its liabilities, and then dividing by the total number of shares outstanding, rounded to the nearest cent. The offering price and redemption price per share are equal to the net asset value per share.

FEDERAL INCOME TAXES: The Fund's policy is to continue to comply with the requirements of the Internal Revenue Code that are applicable to regulated investment companies and to distribute all of its taxable income to shareholders. Therefore, no federal income tax provision is required. It is the Fund's policy to distribute annually, prior to the end of the calendar year, dividends sufficient to satisfy excise tax requirements of the Internal Revenue Code. This Internal Revenue Code requirement may cause an excess of distributions over the book year-end accumulated income. In addition, it is the Fund's policy to distribute annually, after the end of the fiscal year, any remaining net investment income and net realized capital gains.

The Fund recognizes the tax benefits of certain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. Management has analyzed the Fund's tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax years. The Fund identifies its major tax jurisdictions as U.S. Federal and California tax authorities; however the Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the fiscal year ended December 31, 2017, the Fund did not incur any interest or penalties.

DISTRIBUTIONS TO SHAREHOLDERS: Distributions to shareholders, which are determined in accordance with income tax regulations, are recorded on the ex-dividend date. The treatment for financial reporting purposes of distributions made to shareholders during the year from net investment income or net realized capital gains may differ from their ultimate treatment for federal income tax purposes. These differences are caused primarily by differences in the timing of the recognition of certain components of income, expenses or realized capital gain for federal income tax purposes. Where such differences are permanent in nature, they are reclassified in the components of the net assets based on their ultimate characterization for federal income tax purposes. Any such reclassifications will have no effect on net assets, results of operations or net asset values per share of the Fund.

USE OF ESTIMATES: The financial statements are prepared in accordance with GAAP, which requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial

Notes to Financial Statements - continued

statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

OTHER: The Fund records security transactions based on trade date. Dividend income is recognized on the ex-dividend date. Interest income is recognized on an accrual basis. The Fund uses the specific identification method in computing gain or loss on sale of investment securities. Withholding taxes on foreign dividends have been provided for in accordance with the Fund's understanding of the applicable country's tax rules and regulations.

3.) SECURITY VALUATIONS

The Fund utilizes various methods to measure the fair value of most of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of inputs are:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.

Level 2 - Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument in an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Level 3 - Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

FAIR VALUE MEASUREMENTS

A description of the valuation techniques applied to the Fund's major categories of assets measured at fair value on a recurring basis follows.

Equity securities (common stocks, including ADRs). Equity securities generally are valued by using market quotations, but may be valued on the basis of prices furnished by a pricing service when the Adviser believes such prices accurately reflect the fair value of such securities. Securities that are traded on any stock exchange or on the NASDAQ over-the-counter market are generally valued by the pricing service at the last quoted sale price. Lacking a last sale price, an equity security is generally valued by the pricing service at its last bid price. Generally, if the security is traded in an active market and is valued at the last sale price, the security is categorized as a level 1 security. When market quotations are not readily available, when the Adviser determines that the market quotation or the price provided by the pricing service does not accurately reflect the current fair value, or when restricted securities are being valued, such securities are valued as determined in good faith by the Adviser, subject to review of the Board of Trustees (the "Trustees" or the "Board") and are categorized in level 2 or level 3, when appropriate.

Money market funds. Money market funds are valued at net asset value and are classified in level 1 of the fair value hierarchy.

In accordance with the Trust's good faith pricing guidelines, the Adviser is required to consider all appropriate factors relevant to the value of securities for which it has determined other pricing sources are not available or reliable as described above. There is no single standard for determining fair value, since fair value depends upon the circumstances of each individual case. As a general principle, the current fair value of an issue of securities being valued by the Adviser would

Notes to Financial Statements - continued

appear to be the amount which the owner might reasonably expect to receive for them upon their current sale. Methods which are in accordance with this principle may, for example, be based on (i) a multiple of earnings; (ii) a discount from market of a similar freely traded security (including a derivative security or a basket of securities traded on other markets, exchanges or among dealers); or (iii) yield to maturity with respect to debt issues, or a combination of these and other methods.

The following table summarizes the inputs used to value the Fund's assets measured at fair value as of December 31, 2017:

| <u>Valuation Inputs of Assets</u> | <u>Level 1</u> | <u>Level 2</u> | <u>Level 3</u> | <u>Total</u> |
|-----------------------------------|------------------|----------------|----------------|------------------|
| Common Stocks | \$22,148,626 | \$0 | \$0 | \$22,148,626 |
| Money Market Funds | <u>2,118,485</u> | <u>0</u> | <u>0</u> | <u>2,118,485</u> |
| Total | \$24,267,111 | \$0 | \$0 | \$24,267,111 |

Under the terms of the Management Agreement, the Adviser manages the investment portfolio of the Fund, subject to policies adopted by the Trust's Board. Under the Management Agreement, the Adviser, at its own expense and without reimbursement from the Trust, furnishes office space and all necessary office facilities, equipment and executive personnel necessary for managing the assets of the Fund. The Adviser pays all operating expenses of the Fund with the exception of taxes, brokerage fees and commissions, acquired fund fees and expenses, borrowing costs (such as (a) interest and (b) dividend expenses on securities sold short), and extraordinary expenses. For its services, the Adviser receives an annual investment management fee payable monthly from the Fund of 1.50% of the average daily net assets of the Fund. The Adviser has agreed to waive, without recoupment, a portion of its management fee (the "Fee Waiver") so that the management fee, on an annual basis, does not exceed (i) 1.25% of the Fund's average daily net assets greater than \$25 million and up to and including \$75 million, and (ii) 1.00% of the Fund's average daily net assets greater than \$75 million. The Fee Waiver will automatically terminate on April 30, 2018 unless it is renewed by the Adviser. The Adviser may not terminate the Fee Waiver before April 30, 2018.
